Title I School Improvement Executive Summary
Oquirrh Elementary School 2026-2027

Oquirrh Elementary has a plan to improve instruction and learning for all students. You may access a complete outline of the plan on Oquirrh's school website (oquirrh.jordandistrict.org) and in the front office. Here is a brief summary of Oquirrh's current goals for improvement:

Schoolwide Goals:

Oquirrh Elementary will increase proficiency on ELA RISE by 6% by the end of the 2028-29 school year.

- **Strategy:** All grade-level teams will use a standardized planning protocol to ensure targeted lessons that involve the essential standards including intentional engagement strategies; explicit Tier 2 and Tier 3 vocabulary instruction; and knowledge activation and background for the delivery. Teachers will further increase instructional rigor by embedding higher-order questioning into their daily delivery.

Oquirrh Elementary will increase proficiency on Math RISE by 6% by the end of the 2028-29 school year. ML students will increase by 8 percent proficiency.

- **Strategy:** Teachers will use evidence-based practices to support ML's and high needs students. Teachers will conduct regular progress monitoring to close gaps and increase RTI support for these students using evidence-based, differentiated instructional strategies. RTI interventions will happen daily during Math Tier 2. Teachers will collect and use real-time data weekly during PLC's to make instructional decisions and adjust support to close achievement gaps for these student populations.

Oquirrh Elementary At least 60% of students will make typical or better progress on Acadience as measured from BOY to EOY.

- **Strategy:** Using Acadience and other data to guide instruction, we'll implement daily Science of Reading routines in both Tier 1 and Tier 2, identify gaps in student learning and create flexible skill groups based on student need, monitor progress regularly per state requirements, adjust interventions as needed, and share monthly at-home strategies with families. Time will be allocated weekly to plan for robust instruction.

Our principal, Jennifer Ludlow, is willing to address questions regarding this improvement plan. She welcomes your input and feedback to help improve our school. You may reach her at jennifer.ludlow@jordandistrict.org or by calling the school at 801-565-7474.
